PROFESSIONAL SUMMARY

Hands-on experience in land-use analysis, high-precision spatial digitization, temporal mapping, remote sensing, and geospatial data visualization. Proficient in ArcGIS Pro, QGIS, Google Earth Engine, and Python, with experience transforming complex geographic datasets into accurate analyses, clear cartographic products, and actionable spatial insights. Currently pursuing a Bachelor of Science in Geographic Information Systems (GIS) at the University of the Punjab, with a strong interest in GIS development, remote sensing, spatial data science, and applying technology to solve real-world geospatial problems.

EDUCATION

Bachelor of Science in Geographic Information System Oct 2023 – Jun 2027 (Expected)
University of the Punjab, Lahore

Current Semester: 7th Semester
Current CGPA: 3.71

TECHNICAL SKILLS

Languages & Cloud	Python, JavaScript, SQL, Google Earth Engine
GIS Platforms	ArcGIS Pro, QGIS, Kepler.gl
Spatial Data Science	PostGIS / PostgreSQL
System Customization	Rainmeter

CERTIFICATES

NASA ARSET

- Fundamentals of Remote Sensing

ESRI Academy

- GIS Basics
- ArcGIS Pro Basics
- Getting Started with Spatial Analysis
- Getting Started with Imagery and Remote Sensing

WORK EXPERIENCE

GIS Intern

Apr 2024 – Dec 2024

City Pulse (Pvt.) Ltd., Lahore

Project: Master Plans Land-Use and Zoning Plans for Local Government in Punjab (Phase II)

- Executed high-precision on-screen digitization of existing land use and topographic features within Established Built-up Areas (EBAs) for **District Rajanpur** and **District Pakpattan**.

- Executed large-scale land use and land cover (LULC) classifications using Google Earth Engine (GEE), leveraging cloud computing to analyze regional urban expansion patterns.
- Mapped commercial roads networks and categorized abutting properties to support zoning plan development and regulatory frameworks.
- Managed and updated complex attribute datasets for land parcels, ensuring data integrity through rigorous QA/QC protocols.

Surveyor (Traffic & Transportation)
MMP (Pvt.) Ltd., Lahore, Pakistan

May 2023

Project: Master Plans Land-Use and Zoning Plans for Local Government in Punjab (Phase I)

- Conducted comprehensive traffic and transportation surveys across the road networks of **Tehsil Burewala** (Package -V, District Vehari).
- Gathered field data for traffic analysis to support the structural development of regional land-use plans.

SEMESTER PROJECTS

Advance Cartographic Design - Map of Iran

Coursework Project: Advance Cartography | Team of 4 | Leader

- Developed a professional A0-format political and physical map of Iran in **ArcGIS Pro**, emphasizing cartographic hierarchy and aesthetic clarity.
- Created custom symbology for transportation networks, administrative boundaries, and natural features like the Dasht-e Kavir and Dasht-e Lut deserts.
- Managed complex labeling and annotation groups to ensure legibility across multi-scale geographic features.

LULC Classification, District Orakzai, KPK

Coursework Project: Advanced Remote Sensing | Team of 4 | Leader

- Executed supervised land use and land cover (LULC) classification in **ArcGIS Pro**.
- Conducted validation of classification outputs to ensure statistical significance of the final spatial datasets.
- Designed thematic maps illustrating regional land cover distribution.

CelestGIS Platform

Coursework Project: Entrepreneurship | Team of 4 | Member

- Designed and prototyped a specialized GIS learning website using **HTML, CSS, JS, and MySQL**.

Hospital Management System

Coursework Project: Advance Java Programming | Team of 4 | Member

- Developed a terminal-based management application utilizing **Java Object-Oriented Programming (OOP)** principles.

Student Marks System Dashboard

Coursework Project: WebGIS | Team of 4 | Leader

- Designed and prototyped a responsive dashboard using **HTML, CSS, and JavaScript** for the front-end and **MySQL** for database management.

- Developed a dual-access portal with live relational database synchronization, enabling instructors to update academic records in real-time while allowing students to view subject-wise marks and grades.

NON-GIS PROJECTS

Spotibar – Rainmeter Skin

github.com/zoraizlajwer/spotibar

Control Spotify from the Taskbar

- Developed and published an open-source desktop utility to seamlessly control Spotify directly from the Windows Taskbar.
